FOR IMMEDIATE RELEASE

PRINCE WILLIAM HOSPITAL SELECTS REVENUE360 TO IMPROVE REGISTRATION ACCURACY

March 24, 2008 – Beaverton, OR -- Provider Advantage NW, Inc., a national provider of automated, integrated real-time revenue cycle solutions, announced today that Prince William Hospital has selected Revenue360 to improve their patient registration process by preventing registration errors before they are entered into their registration system.

This agreement provides Prince William Hospital, a 170- bed facility located in Manassas, VA, with Revenue360 Insurance Code Solution, one of six modules that complete the Revenue360 Solution. Using Automated Intelligent Guidance, Revenue360 Insurance Code Solution proactively and intelligently guides and prompts registrars to capture and sequence the correct insurance information with every registration. Addressing the continuous changes in the insurance arena, with an ever increasing number of new insurance plans and cards with multiple logos and billing address requirements, Revenue360 reduces denied claims and payment delays, improving the hospital's revenue cycle.

Revenue360, created by Provider Advantage and Cincom Systems, is an intelligent software solution that integrates with a hospital's patient registration system enabling the collection of accurate patient information at the point of registration. Modules in addition to Insurance Code Solution, include Demographic Validation, Eligibility Verification, Payment Assessment, Medicaid/Charity Assessment, and Pricing Estimator.

“Prince William Hospital has the reputation of being innovative and forward thinking,” said Ted Tomkins, President of Provider Advantage. “It is the type of hospital that continually seeks opportunities to refine its operations and improve

the patient experience. We are delighted Prince William selected our Insurance Code Solution module, giving the hospital an opportunity to improve the patient registration process and eliminate registration errors before treatment.”

“We have selected Revenue360 because of its ability to assist in the identification of insurance cards at the click of a mouse, which will result in an increase in registration accuracy and staff productivity,” said Marilyn Evans, Director, Patient Access Services for Prince William Hospital. “The ability to utilize Revenue360 as a training tool to increase staff competency and to easily create new rules without IS intervention are also features that have affected our decision to select Revenue360.”
